

### **SDG 3: ayzh, Elevating Women's Health**

#### **Ayzh**

Ayzh is elevating women's health to be a core topic in the world. The mission of ayzh (pronounced "eyes") is to bring simplicity and dignity to women's health worldwide by providing girls and women access to health throughout their lives so they can deliver a healthier and wealthier world, passed on to generations. Directly aligned with this mission, our solution aims to transform access to essential products that help women and their children survive (end preventable mortality) and thrive (improve health and well-being).

Ayzh puts into action core principles that drive change with a proven model that is sustainable, gender responsive, evidence-informed, human-centered, partnership-driven, and aligned with advancing the Sustainable Development Goals and the Global Strategy for Women's, Children's and Adolescents' Health. As a pioneer in the sustainable business and women's health.

Since forming in 2010, ayzh remains committed to demonstrating how a social enterprise – one that is built on addressing critical challenges faced by the world's most vulnerable women – can be sustainable and scalable.
