Damilola Adeyemi

CTO and Co-founder, D-Olivette Enterprise

[Website](#) • [Instagram](#) • [Facebook](#)

Damilola Aminat Adeyemi is an environmentalist, cleantech enthusiast and CTO and co-founder of D-Olivette Enterprise, an environmental and renewable energy social enterprise using biotechnologies to create accessible and affordable clean energy for rural, off-grid and agrarian communities in Africa.

Damilola is passionate about using digital technologies to tackle energy-poverty, environmental and climate challenges. To that end, the Nigeria-based D-Olivette Enterprise helps thousands of rural women in sub-Saharan Africa access clean cooking fuel through a popular domestic reactor called the Kitchen Box.

The Kitchen Box turns household food waste and biodegradable wastewater into biogas, clean water and organic fertilizer. Damilola's technology has been fine-tuned such that the biogas can be used 100 percent safely, and even transported around in ISO-certified handbags for resale or usage in other locations.
