Eri Eats Foods

Starting agro processing trade in 2022, Eri-Eats is a company based in Durban, Kwa-Zulu Natal, we do agro processing where we purchase our primary produce from local small growers and generate products such as Macadamia nut brittles and macadamia snacks. The director of the company is an agriculture graduate; our overall goal is to encourage farming in households as a source of income no matter the size of the farming plot. We would make preserved products from the primary produce. At present we supply a local cafe with our produce and are looking at expanding to other ventures such as weekend markets, international and national trade events.
