

MENTEE

Philomina Brittain

Managing Director, Green-Gro Ltd

Ghana

With a BSc in biology and chemistry from the University of Cape Coast, Ghana, Philomena is a seasoned expert in organic materials and agriculture. Her extensive training includes studies at the Rhodale Institute and the University of California, Davis, among others. With years of experience in organic substrates and pest controllers, Philomena's achievements include building a pilot plant for cocopeat 'Kube' in the UK and establishing Green-Gro Limited in Ghana. Her work in waste management, collaboration with Yorkshire Water, and development of the "Gro-Plenty" organic fertilizer showcase her commitment to sustainable practices. Philomena's ventures expanded to include "Gro-Safe," a cold-pressed virgin neem oil serving as an organic pest controller. Active in international conferences and training programs, she is a member of the Society for the Advancement of Science in Africa (SASA) and has represented Ghanaian 'Women in Industry' at global conferences. In Ghana, she has collaborated with various organizations and initiatives in agriculture, forestry, and food export.

Green-Gro Ltd

Green-Gro produces organic agricultural inputs such as fertilizers, pesticides, and veterinary products for treating livestock and pets. Green-Gro supplies manufactured products to wholesale and retail shops across the capital and some parts of the country. The business also has a mechanized online platform for sales, promotions, advertisements, and information.
